Frameworks & Libraries
Laminas/Mezzio, Laravel, Symfony, Vue.js, Next.js, Jquery, Styled, Bootstrap

Languages
English (B2), Spanish (Native)
Experience working with international teams via Scrum & Agile.

Databases
PostgreSQL, Mysql, Memcached, Redis, MongoDb

Experience

Freelance as **Senior Developer** / *Remote, CO* (Oct 2024)
- Collaborated on the development of a distributed marketing platform with microservices and a multi-database architecture.
- Designed and implemented RESTful APIs using PHP and Laminas Framework, applying PSR-7 middleware architecture for flexible service composition.
- Integrated WebSocket services built in NodeJS to support real-time communication between backend and client-facing systems.
- Developed responsive and accessible user interfaces using Bootstrap, jQuery, and custom JavaScript components.
- Integrated OpenAI's embedding model to enable intelligent chatbot responses based on semantic understanding of data stored in the platform's databases.
- Managed third-party service integration, including Wompi (Bancolombia) payment API and Keycloak for secure authentication and role-based access.
- Developed a custom Storybook and reusable boilerplate to streamline and accelerate the development of Next.js applications. (NPM)
- Documented system architecture, workflows, and technical diagrams for internal documentation and future scalability.

Progi as **Senior Developer** / *Medellín, CO* (Jul 2023 - Sep 2024)
- Refactored legacy CodeIgniter applications, enhancing code efficiency and reducing technical debt.
- Developed new features with Vue.js and Symfony, improving system maintainability.
- Strengthened application security and performance through unit tests (PHPUnit).
- Successfully coordinated remote Agile teams, ensuring on-time delivery of key projects.

Trabajopolis as **Programador Experto** / *Bogotá, CO,* (Jun 2022 - Dic 2022)
- Led the troubleshooting and debugging of the 2.0 portal, reducing system errors by 50%.
- Developed new functionalities that improved system user experience and efficiency.
- Managed project timelines and task prioritization for agile software development.

vivilasbs.io as **Full Stack Developer** / *Bogotá, CO* (Nov 2020 - Jun 2022)
- Built REST APIs in PHP (Mezzio & Laminas MVC), ensuring high-performance back-end communication.
- Integrated GitLab pipelines for automated deployment, reducing manual intervention by 80%.
- Improved overall project efficiency through structured activity-tracking meetings and effective team collaboration.

Insoftar as **Ingeniero Senior** / *Bogotá, CO* (Oct 2019 - Nov 2020)
- Managed AWS environments, ensuring scalable and secure infrastructure for applications.
- Led database optimizations for report automation and efficient query execution.
- Implemented best practices in Git version control, improving team workflow and code quality.

Education

AWS Certified Cloud Practitioner *Bogotá, CO* (2020)

Corporación Universitaria Minuto de Dios *Bogotá, CO* (2014-2019)
- Ingeniero de Sistemas

Corporación Universitaria Minuto de Dios *Girardot, CO* (2001-2004)
- Tecnólogo en Informática
